AMENDMENTS TO THE SPECIFICATION

On page 1, please amend the specification by inserting the following paragraph after the Title:

This application is a continuation-in-part of U.S. Patent Application Serial No. 10/119,433, filed April 9, 2002, which claims the benefit of priority under 35 U.S.C § 119(e) from U.S. Provisional Application Serial No. 60/293,466, filed May 24, 2001, entitled "Method and System for Distributing Traffic to Multiple Load Balancers," the benefit of each is further claimed herein.

**PETITION UNDER 37 C.F.R. § 1.78(A)(3) FOR UNINTENTIONALLY DELAYED CLAIM
UNDER 35 U.S.C. § 120 FOR THE BENEFIT OF PRIOR-FILED APPLICATIONS**

MS Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicant hereby petitions the Commissioner pursuant to 37 C.F.R. § 1.78(a)(3) to accept an unintentionally delayed claim for benefit of priority in this application.

This application is a continuation-in-part of U.S. Patent Application Serial No. 10/119,433, filed April 9, 2002 (which was co-pending with the present application when filed), which claimed the benefit of priority under 35 U.S.C. § 119(e) from U.S. Provisional Application Serial No. 60/293,466, filed May 24, 2001. The specification and Application Data Sheet inadvertently and unknown to Applicant or his attorneys failed to refer to the direct parent applications, Serial No's.

10/119,433 and its Provisional 60/293,466.

04/21/2006 WABDELRI 00000025 10644692

01 FC:1454

1370.00 OP

{S:\08204\1200311US2\80058357.DOC #####}

Applicant therefore petitions the Commissioner to accept his claim for the benefit of Serial No. 10/119,433 and its Provisional 60/293,466. The entire delay between the date the claim was due under 37 CFR § 1.78(a)(2) and the date of this petition was unintentional.

This petition is accompanied by the following:

1. Surcharge under 37 C.F.R. § 1.17(t) in the amount of \$1370.00; and
2. The reference required by 35 U.S.C. § 120, 35 U.S.C. § 119 and 37 C.F.R. § 1.78(a)(2), in the form of an amendment amending the first sentence of the specification following the title to include a reference to the prior-filed applications Serial No's. 10/119,433 and 60/293,466, and also a Supplemental Application Data Sheet.

Applicant submits that all the requirements of 37 C.F.R. § 1.78(a)(3) are satisfied, and the Commissioner is respectfully requested to grant this Petition.

Dated: April 18, 2006

Respectfully submitted,

By

METHOD AND SYSTEM FOR SCALING NETWORK TRAFFIC MANAGERS

Field of the Invention

The present invention relates to computer network traffic, and in particular to
5 distributing network traffic associated with traffic management devices.

Background

The Internet's core bandwidth continues to double every year. Some of
this additional bandwidth is consumed as more and more users access the Internet.
Other additional bandwidth is consumed as existing users increase their use of the
10 Internet. This increase of Internet use translates into an increase in traffic directed to
and from World Wide Web (WWW) servers and other Internet servers.

Replacing a WWW server with a WWW server of twice the capacity is a
costly undertaking. Adding additional WWW servers is less costly but generally
requires a load-balancing mechanism to balance workload so that each virtual server
15 performs work proportional to its capacity and the number of servers available to the
traffic management device that is performing the load balancing.

This requirement for more sophisticated traffic management requires
more processing. With a sufficient rate of requests, eventually a traffic management
device may not be able to process traffic in a timely manner. Therefore, it is with
20 respect to these considerations and others that the present invention has been made.

Brief Description of the Drawings

Non-limiting and non-exhaustive embodiments of the present invention
are described with reference to the following drawings. In the drawings, like reference
numerals refer to like parts throughout the various figures unless otherwise specified.

25 For a better understanding of the present invention, reference will be
made to the following Detailed Description of the Invention, which is to be read in
association with the accompanying drawings, wherein:

FILING RECEIPT

OC000000011266311

Date Mailed: 11/14/2003

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

Title

Method and system for scaling network traffic managers

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
